

InnoVet™ CR

DIGITAL RADIOGRAPHIC SYSTEMS

Enhanced Veterinary Imaging

InnoVet™ CR Systems – *Right for Today and Tomorrow*

InnoVet™ CR Systems are the affordable choice in today's marketplace, offering the same long-term dependable performance that has become synonymous with the InnoVet™ name.

InnoVet™ CR Systems work with your existing or new x-ray system and produce quality digital images without the need of a darkroom, processor, film, chemicals or film storage space.

Proven Designs, Delivering Top Performance and Reliability

The patented flat scan path and few moving parts of the InnoVet™ CR imaging plate reader, reduce imaging plate stress, dramatically increase plate life and significantly reduce the cost of ownership. Designed with reliability in mind, the InnoVet™ CR Systems feature automatic plate loading and erasing for optimal image quality and rapid throughput. The 16 bit digital images provide the finest grayscale sensitivity.

The reader capacity of 40, 14 x 17 inch plates per hour is ideal for most practices and an optional 60 plates per hour model is available for heavy workloads. InnoVet™ CR Systems require a minimal amount of office space. The system may be placed on a counter or optionally wall mounted or placed on a cart.

User-friendly Software

Our quality processing center software provides a full range of CR functions for veterinary applications including Windows-based operation, intuitive toolbars for easy navigation, image enhancement tools, DICOM and network capabilities.

Professional Support is Standard

All the benefits of the InnoVet™ CR Systems and digital imaging are enhanced by on-site installation and applications training.

Protect Your Investment

Backed by a one-year parts warranty on the hardware with an extraordinary three-year warranty on the imaging plates, InnoVet™ CR Systems provide exceptional performance and long-term investment value. Extended hardware warranty, as well as support agreements for both the standard and optional software modules, are available.

InnoVet™ CR Workstation System – Simple and Versatile

The CR Workstation System is ideal for any veterinary practice requiring a stand-alone imaging workstation that is easy to use, and ready for archive networking in the future.

Patient images are DICOM compatible and can be easily copied to CD or DVD for back-up and client distribution or e-mailed to consulting specialists in JPEG or TIFF formats.

InnoVet CR Workstation System

InnoVet™ CR Network System – Adds Value to your Practice

The CR Network System is specifically designed to meet the needs of busy animal hospitals and specialty practices that have a need for multiple workstations and network integration capabilities. View digital images at any networked monitor in your clinic, with a client or associate, using the optional image viewer software. The RIS-DICOM Query Worklist software allows interfacing with RIS or PACS systems.

Because pets and their people rely on you, rely on the leader in veterinary radiography. Call 800-972-9776 for the InnoVet™ CR dealer near you.
